Import table

Table 1: TABLE 1 - REGRESSIONS OF SCALED EARNINGS ON GENERATIVE AI

	earnings_scaled
gen_ai	2.167***
	(0.741)
Constant	5.781***
	(0.554)
Observations	157
R^2	0.050
F	8.546
p-value	0.004

Notes. Robust standard errors in parentheses. $^{*}p < 0.10$, $^{**}p < 0.05$, $^{***}p < 0.01$.

Summary

- We study whether generative AI use is associated with (scaled) earnings.
- We regress scaled earnings on a generative AI indicator with heteroskedasticity-robust standard errors.
- We find a positive and statistically significant association (see Table 1).
- The estimate, the table, and the paper all update automatically when the underlying data change.

Thank you!
